Access model: Syllabi, outcomes, and tuition are public. Full course content unlocks after registration and payment. NOVA School offers free demo missions on Coding & AI, Robotics, and IoT electives.

Suggested tuition fees (USD)

Category	Suggested price
School standard electives	\$179 / elective
School premium (Coding, Robotics, IoT + demo missions)	\$249 / elective
Cybersecurity Teens	\$199 / elective
School Explorer Pass (all 9 electives)	\$1,299 / year
College Tier 1 tracks	\$749 – \$949 (most \$849 – \$899)
Quantum Workforce — Tier 2 Advanced (QCW)	\$1,899 / program
College Career Starter (any 2 Tier 1 tracks)	\$1,499
NOVA Language (each)	\$449 / program
Language Trilingual Pack (EN + ES + PT)	\$999

NOVA School — Youth Electives (9)

Gaming & Game Design

\$179 / elective

From player to creator — design levels, characters, and playable worlds.

Explorers learn game loops, level design, and basic coding through Scratch and Unity-style projects — building portfolio-ready games they can share.

Duration

12 weeks

Age range

8–16

Tuition (USD)

\$179

Access

Paid after registration

- Game loops & mechanics
- Level & character design
- Scratch + intro game engines
- Portfolio showcase

Project-based modules + Innovation Mentor check-ins

Digital Marketing & Social Media

\$179 / elective

Tell stories that spread — branding, content, and analytics for young creators.

Hands-on elective covering personal brand, social campaigns, visual content, and ethical digital citizenship for the next generation of creators.

Duration

10 weeks

Age range

8–16

Tuition (USD)

\$179

Access

Paid after registration

- Personal brand basics
- Content planning
- Visual storytelling
- Ethical digital citizenship

Project-based modules + Innovation Mentor check-ins

Startup & Business Innovation

\$179 / elective

Idea to pitch — entrepreneurship, prototyping, and problem-solving for young founders.

Explorers develop a real mini-startup: identify a problem, build a prototype, craft a pitch, and present to mentors in a celebration showcase.

Duration

12 weeks

Age range

8–16

Tuition (USD)

\$179

Access

Paid after registration

- Problem discovery
- Lean canvas for youth
- Prototype sprint
- Pitch & showcase

Project-based modules + Innovation Mentor check-ins

Coding & AI

\$249 / elective

Python, algorithms, and AI concepts — from first script to intelligent projects.

Aligned with the Coding & AI Mission Path. Programming fundamentals, computational thinking, and AI discovery through guided missions and LAB builds.

Duration

16 weeks

Age range

8–16

Tuition (USD)

\$249

Access

Free demo mission → paid full course

Preview

Try mission: The Signal Goes Dark: </experiences/restore-nova-signal>

- Python fundamentals
- Computational thinking
- AI discovery missions
- ESP32 optional builds

Includes interactive Mission Path + mentor sessions

Introduction to Robotics

\$249 / elective

Design, wire, and program robots — engineering process from sketch to autonomous bot.

Aligned with the Robotics Mission Path. Electronics, microcontrollers, ESP32 builds, and engineering design challenges with Wokwi simulation fallback.

Duration

16 weeks

Age range

8–16

Tuition (USD)

\$249

Access

Free demo mission → paid full course

Preview

Try mission: Rescue at Sector 7: </experiences/rescue-rover>

- Engineering design process
- Electronics & wiring
- ESP32 programming
- Wokwi simulation fallback

Includes interactive Mission Path + mentor sessions

IoT & Smart Systems

\$249 / elective

Sensors, connectivity, and smart devices — build the connected world.

Aligned with the IoT Mission Path. Smart sensors, wireless systems, cloud dashboards, and real-world automation projects.

Duration

16 weeks

Age range

8–16

Tuition (USD)

\$249

Access

Free demo mission → paid full course

Preview

Try mission: Red Alert Greenhouse: </experiences/smart-greenhouse>

- Sensors & actuators
- MQTT & connectivity
- Cloud dashboards
- Smart automation projects

Includes interactive Mission Path + mentor sessions

Digital Content Creation

\$179 / elective

Video, design, and media — craft stories that inspire and inform.

Explorers produce videos, graphics, and multimedia portfolios using industry-inspired tools — storytelling, editing, and visual design fundamentals.

Duration

10 weeks

Age range

8–16

Tuition (USD)

\$179

Access

Paid after registration

- Storyboarding
- Video editing basics
- Graphic design intro
- Multimedia portfolio

Project-based modules + Innovation Mentor check-ins

Cybersecurity Basics for Teens

\$199 / elective

Defend your digital life — passwords, privacy, phishing, and ethical hacking intro.

Age-appropriate security elective: safe online habits, threat awareness, basic network concepts, and ethical responsibility in the digital world.

Duration

8 weeks

Age range

10–16

Tuition (USD)

\$199

Access

Paid after registration

- Password hygiene
- Phishing awareness
- Privacy fundamentals
- Ethical hacking intro

Project-based modules + Innovation Mentor check-ins

Creative Tech & Social Impact for Teens

\$179 / elective

Design, creativity, and purpose — a welcoming STEAM path for teens exploring STEM beyond wires and code.

A creative elective for teens: design thinking, creative coding with Scratch, digital storytelling, diverse STEM role models, and team projects that solve real community problems — less hardware-heavy, more human-centered.

Duration

10 weeks

Age range

8–16

Tuition (USD)

\$179

Access

Paid after registration

- STEM role models & careers
- Design thinking & empathy
- Creative coding (Scratch)
- Social-impact team projects

Project-based modules + Innovation Mentor check-ins

NOVA College — Employability Tracks (9)

Técnico en Soporte IT y Cloud

\$899 / track

De la banca de servicio al cloud — hardware, redes y AWS para el primer empleo tech.

Programa técnico de 120 horas orientado a empleabilidad que prepara a estudiantes para roles de help desk, soporte de TI y operaciones cloud entry-level. Combina fundamentos de hardware y sistemas operativos (CompTIA A+), conectividad de red (Network+), y servicios cloud con enfoque AWS Cloud Practitioner. Diseñado para colegios técnicos y community colleges que licencian currículo NOVA + plataforma NOVA STEM HUB.

Duration

120 contact hours

Age range

16–25+

Tuition (USD)

\$899

Access

Paid after registration

Certificate

NOVA-COL-IT

- Diagnosticar y resolver fallas comunes de hardware, software y conectividad siguiendo metodología estructurada de troubleshooting.
- Instalar, configurar y mantener sistemas operativos Windows y Linux en entornos de escritorio.
- Explicar modelos TCP/IP, direccionamiento IP, DNS, DHCP y configurar redes locales básicas.
- Aplicar principios de ciberseguridad básica: autenticación, permisos, backups y respuesta a incidentes de nivel 1.

QCW-style lessons · verifiable certificate · exam prep included

Analista de Ciberseguridad

\$949 / track

Defiende redes y datos — SOC fundamentals, threat detection y Security+.

Programa técnico de 120 horas que forma analistas de ciberseguridad entry-level capaces de operar en un Security Operations Center (SOC), responder incidentes y aplicar controles alineados a CompTIA Security+. Incluye labs de SIEM, análisis de logs, hardening y simulaciones de ataque/defensa en entorno controlado.

Duration

120 contact hours

Age range

16–25+

Tuition (USD)

\$949

Access

Paid after registration

Certificate

NOVA-COL-SEC

- Explicar principios de confidencialidad, integridad, disponibilidad y modelos de amenazas (STRIDE intro).
- Implementar controles de identidad: MFA, RBAC, principio de least privilege y gestión de credenciales.
- Analizar tráfico de red y logs de sistema para detectar actividad anómala con Wireshark y SIEM simulado.
- Ejecutar playbooks de respuesta a incidentes: identificar, contener, erradicar, recuperar y documentar.

QCW-style lessons · verifiable certificate · exam prep included

Técnico en Análisis de Datos

\$899 / track

De Excel a SQL, Python y Power BI — el stack completo para tu primer empleo como analista de datos.

Programa técnico de 120 horas orientado a empleabilidad que prepara analistas de datos entry-level con el stack moderno: Excel avanzado y Power Query, SQL intermedio (JOINS, CTEs, window functions), Python/pandas para análisis reproducible, estadística descriptiva aplicada y dashboards Power BI. Alineado a Google Data Analytics Certificate y Microsoft Power BI Data Analyst (PL-300). Diseñado para colegios técnicos, bootcamps y community colleges que licencian currículo NOVA + plataforma NOVA STEM HUB.

Duration

120 contact hours

Age range

16–25+

Tuition (USD)

\$899

Access

Paid after registration

Certificate

NOVA-COL-DA

- Describir el ecosistema analítico, roles (analyst/scientist/engineer) y ciclo de vida de un proyecto de datos.
- Formular preguntas SMART, definir KPIs y documentar reglas de negocio en un data dictionary.
- Automatizar reportes con Excel (Power Query, pivot tables, INDEX-MATCH) y visualizaciones accesibles.
- Escribir consultas SQL intermedias: JOINS, GROUP BY, subconsultas, CTEs y window functions sobre bases relacionales.

[QCW-style lessons](#) · [verifiable certificate](#) · [exam prep included](#)

Técnico en IoT y Sistemas Inteligentes

\$899 / track

Sensores, MQTT y edge — del prototipo ESP32 al despliegue industrial entry-level.

Programa técnico de 120 horas que eleva las competencias del pathway NOVA IoT a nivel empleabilidad técnica: protocolos industriales, edge computing, dashboards profesionales, seguridad IoT y mantenimiento de sistemas conectados. Ideal para técnicos de facilities, agrotech, smart buildings y manufactura ligera.

Duration

120 contact hours

Age range

16–25+

Tuition (USD)

\$899

Access

Paid after registration

Certificate

NOVA-COL-IOT

- Describir el mercado IoT, arquitecturas edge-fog-cloud y seleccionar protocolos/conectividad según vertical y restricciones.
- Desarrollar firmware ESP32 con WiFi/BLE, FreeRTOS, deep sleep y buses I2C/SPI para nodos multi-sensor resilientes.
- Implementar mensajería MQTT con topics jerárquicos, QoS apropiado y brokers Mosquitto, HiveMQ o AWS IoT Core.
- Diseñar gateways edge con umbrales, actuadores, store-and-forward y flows Node-RED para integración heterogénea.

[QCW-style lessons](#) · [verifiable certificate](#) · [exam prep included](#)

Técnico en Robótica y Automatización

\$949 / track

Industria 4.0 en planta — PLC, cobots, ESP32, neumática y robótica de servicio para el técnico entry-level.

Programa técnico de 120 horas que forma técnicos capaces de operar en manufactura y servicios automatizados: leer diagramas eléctricos y neumáticos, programar PLCs en TIA Portal (intro ladder), integrar HMI/SCADA, diagnosticar sensores 24V, configurar cobots colaborativos y AMR logísticos, desplegar gateway ESP32 con Wokwi fallback, y dar primeros pasos en ROS 2. Combina seguridad industrial (LOTO/E-stop), neumática ISO, redes Modbus/Profinet y simulación Factory I/O — empleabilidad entry-level en manufactura global.

Duration

120 contact hours

Age range

16–25+

Tuition (USD)

\$949

Access

Paid after registration

Certificate

NOVA-COL-ROBOT

- Describir Industria 4.0, roles de automatización y aplicar LOTO/E-stop antes de intervenir en células robotizadas o neumáticas.
- Leer diagramas eléctricos y neumáticos ISO; cablear circuitos 24V DC con sensores PNP/NPN y gateway ESP32 para telemetría.
- Programar ladder logic intro en TIA Portal: marcha/paro, TON/TOF/TP, CTU y secuencias con interlocks.
- Diferenciar robots industriales, cobots colaborativos y AMR de servicio; aplicar awareness ISO 10218 en piso de planta.

[QCW-style lessons](#) · [verifiable certificate](#) · [exam prep included](#)

Introducción a las Telecomunicaciones

\$849 / track

De cobre a fibra y 5G — cableado, wireless, VoIP y field ops para el primer empleo telecom.

Programa técnico de 120 horas que introduce las telecomunicaciones modernas: señales, cableado estructurado, fibra óptica, wireless/celular, VoIP, WAN y operaciones de campo. Alineado a dominios CompTIA Network+, conceptos ETA Fiber Optics Technician (FOT-NP) y BICSI Installer 1. Diferenciador NOVA College: pocos community colleges ofrecen fibra + celular + VoIP integrados en un solo track entry-level.

Duration

120 contact hours

Age range

16–25+

Tuition (USD)

\$849

Access

Paid after registration

Certificate

NOVA-COL-TEL

- Describir la industria telecom, roles entry-level y marco regulatorio de espectro en USA y.
- Explicar fundamentos de señales, modulación, multiplexación y relación frecuencia/ancho de banda.
- Terminar, probar y certificar cableado de cobre según TIA-568 con documentación TIA-606.
- Realizar empalmes básicos de fibra, medir pérdida con power meter e interpretar trazas OTDR intro.

[QCW-style lessons](#) · [verifiable certificate](#) · [exam prep included](#)

Técnico en Electrónica

\$849 / track

De Ohm a microcontroladores — DC/AC, soldadura, instrumentos y troubleshooting para manufactura y campo.

Programa técnico de 120 horas que forma técnicos en electrónica capaces de analizar circuitos DC/AC, ensamblar y soldar PCBs, usar instrumentación de banco, leer datasheets y diagnosticar fallas en equipos. Alineado a ETA Associate Certified Electronics Technician (DC/AC) e IPC-A-610 workmanship awareness. Complementa tracks de IoT, Robotics, Telecom e IT — la base hardware que muchos programas software-only omiten.

Duration

120 contact hours

Age range

16–25+

Tuition (USD)

\$849

Access

Paid after registration

Certificate

NOVA-COL-ELE

- Aplicar Ley de Ohm, Kirchhoff y análisis serie/paralelo para predecir y verificar mediciones DC.
- Explicar comportamiento de capacitores, inductores y transformadores en circuitos AC y filtros pasivos.
- Polarizar diodos, LEDs y transistores; diseñar drivers de conmutación para cargas DC.
- Interpretar tablas de verdad, compuertas lógicas y programar GPIO/ADC básico en Arduino o ESP32.

[QCW-style lessons](#) · [verifiable certificate](#) · [exam prep included](#)

Digital Marketing & Business Growth

\$749 / track

Brand, content, social, and ads — build real campaigns and launch a creative business career.

120-hour employability track for digital marketing, social media, and e-commerce growth — creative and business-focused, with no heavy coding or hardware required. Aligned to Meta Certified Digital Marketing Associate and Google Digital Marketing & E-commerce Certificate domains.

Duration

120 contact hours

Age range

16–25+

Tuition (USD)

\$749

Access

Paid after registration

Certificate

NOVA-COL-DMK

- Develop brand strategy, personas, and multi-channel content calendars.
- Create visual and video content with industry-standard tools (Canva, etc.).
- Plan and report on social, email, and paid campaigns with ethical data use.
- Apply SEO and content marketing to drive organic growth.

[QCW-style lessons](#) · [verifiable certificate](#) · [exam prep included](#)

Quantum Workforce — Computación Cuántica

\$1899 / Tier 2 program

Del qubit al empleo — Qiskit, algoritmos NISQ y portafolio industry-ready (Tier 2 Advanced).

Track avanzado NOVA College powered by Quantum Computing Workforce (QCW) — currículo college/university ya desplegado con simuladores interactivos (Bloch sphere, gate playground, banco óptico, /concepts). 12 módulos desde fundamentos hasta capstone de carrera. Ideal para instituciones que licencian NOVA College y quieren diferenciador cuántico sin montar departamento propio.

Duration

120 contact hours

Age range

16–25+

Tuition (USD)

\$1,899

Access

Paid after registration

Certificate

NOVA-COL-QNT

Preview

Preview QCW interactive platform: <https://quantum-workforce-academy.vercel.app>

- Explicar qubits, superposición, medición y entrelazamiento sin mitos de paralelismo infinito.
- Aplicar álgebra lineal y productos tensoriales a circuitos multi-qubit.
- Construir y ejecutar circuitos en Qiskit (simulator y hardware cloud intro).
- Implementar Deutsch-Jozsa, Grover y workflows VQE/QAOA introductorios.

Interactive labs in QCW app · Certificate NOVA-COL-QNT

Quantum Computing Workforce (QCW) — Tier 2 Advanced

12-module curriculum from qubit fundamentals to industry capstone. Interactive labs: Bloch sphere, gate playground, optical bench, Qiskit projects. Certificate **NOVA-COL-QNT**. Pathway to IBM Quantum Developer Certification.

Platform: quantum-workforce-academy.vercel.app · Course: quantum-computing-workforce-development

NOVA Language — CEFR Programs (3)

Learn English

\$449 / program

From first conversation to professional fluency — grammar, speaking, and real-world confidence.

Structured English program with listening, speaking, reading, and writing — CEFR A1→B2 path for learners worldwide.

Duration

80 hours · A1 → B2

Age range

All ages

Tuition (USD)

\$449

Access

Paid after registration

- CEFR-aligned path
- Speaking labs
- Professional basics
- Verifiable certificate

CEFR-aligned path · speaking labs · verifiable completion

Learn Spanish

\$449 / program

Speak, read, and connect — practical Spanish for travel, work, and everyday life.

Comprehensive Spanish program with conversation labs, grammar in context, and cultural communication skills.

Duration

80 hours · A1 → B2

Age range

All ages

Tuition (USD)

\$449

Access

Paid after registration

- Conversation-first
- Grammar in context
- Cultural communication
- Verifiable certificate

CEFR-aligned path · speaking labs · verifiable completion

Learn Portuguese

\$449 / program

Brazilian and European foundations — pronunciation, conversation, and professional basics.

Portuguese program covering core grammar, speaking practice, and cultural nuance for global learners.

Duration

80 hours · A1 → B2

Age range

All ages

Tuition (USD)

\$449

Access

Paid after registration

- BR + EU foundations
- Pronunciation labs
- Professional basics
- Verifiable certificate

CEFR-aligned path · speaking labs · verifiable completion

Bundle packages

NOVA School Explorer Pass

\$1,299 / year · save ~\$500 vs individual

All 9 youth electives for one Explorer — best value for homeschool & gifted programs.

\$1,299 · save ~\$500 vs individual

Includes: gaming-game-design, digital-marketing, startup-business, coding-ai, robotics-engineering, iot-smart-systems, digital-content-creation, cybersecurity-basics, creative-tech-social-impact-teens

College Career Starter (pick 2)

\$1,499 · any 2 Tier 1 tracks

Choose any two Tier 1 employability tracks — stack skills for your first tech role.

\$1,499 · save ~\$300 vs individual

Includes: it-support-cloud-technician, cybersecurity-analyst, data-analytics-technician, iot-smart-systems-technician, robotics-automation-technician, intro-telecommunications, electronics-technician, digital-marketing-business

NOVA Language Trilingual Pack

\$999 · all 3 languages

English, Spanish, and Portuguese — full CEFR paths for global learners.

\$999 · save ~\$348 vs individual

Includes: english, spanish, portuguese

NOVA STEM HUB · stem-innovation-academy.vercel.app

Live catalog: </catalog> · Quantum: quantum-workforce-academy.vercel.app

Tuition shown are suggested list prices. Scholarships and B2B licensing available. Prices subject to change.
